Description								
<p>This class is intended to introduce students to the basic concepts of Algebra. Because this class is an introduction to Algebra, I will evaluate where students are at and begin where it best suits our class. Therefore, we may begin with concepts even more basic than the text book if needed. Students should be able to gain confidence with foundational principles to prepare them for higher levels of Algebra. Some knowledge of Algebra will be helpful, but not required.</p>
